## Course Overview

Half day program held at Dubai Autodrome, Learn valuable techniques for everyday driving in the conditions within the UAE. This Course can be conducted in your own car or in the fully prepared Audi TT.

**Fortunately, few of us experience emergency driving situations, however it is crucial to be as prepared as possible for any road situation eventuality. In this highly informative course you will learn ways to deal with the daily problems we all face on the roads within the UAE. From emergency driving techniques, what to do in a breakdown situation to child safety. All activities are conducted under the supervision of Audi certified instructors.**

### Course content:

The day begins with a simple overview of basic driver safety and driving dynamics. Following this, participants are taken down to the activity area where they actively experience and learn how to react in difficult situations. Technologies commonly fitted to vehicles such as ABS Brakes, Stability systems will be shown in both the handling course and emergency braking techniques, On returning to the paddock participants will experience what it feels like to be driving while tired and simulate the effects of prescription drugs have on reaction speeds. The course ends with a module on how to deal with a break down and traveling with infants.
